We have plenty of the Galfab THE Hooker systems in stock. These come as complete kits ready to be installed. The Hooker is just one more step in engineering the danger of putting the driver in a space prone to head cuts and injuries.

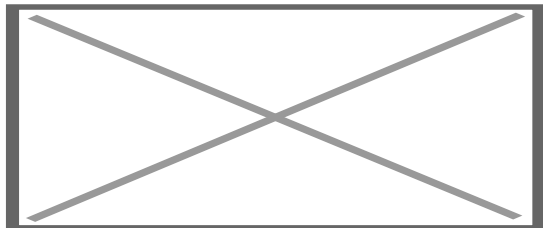

Please call, text or email Aaron with any questions

Thank you

The Hooker

A securement system that works on containers using 2" x 6" tubing long sills with the area above and outside open and free. Cross member locations will not interfere with the hold capability of THE HOOKER provided they are 3" or more in height. THE HOOKER system is designed to be used with container in transport (lowered not raised) position only.

Our Advantage

Galfab THE HOOKER System

Adaptable Design

If one Hooker arm is obstructed by a cross member, the other arm will engage and secure the container.

Galfab THE HOOKER System

Easy to Maintain

All moving parts are greaseable and replaceable. The unit is also self cleaning to minimize operating maintenance.

Galfab THE HOOKER System

Low Profile

"The Hooker" is only 3" tall and folds down and out of the way for loading and unloading containers.

TCS Parts

Welcome to Truck Component Services - your home of heavy truck used parts and chassis. We deal in heavy duty trucks and truck parts, including diesel engines, transmissions, oil pans, flywheel...
